percentage-96 %

SUBRAMANIA BHARATHI HIGHER SECONDARY SCHOOL

2015-2016

High School Education
percentage-99.4%

Projects

CROP MANAGEMENT SYSTEM

The main objective of this system is to create an user friendly web based interface to the farmers for managing crop and farm related activities irrespective of any odds. By updating the daily activities and future tasks to be performed, it will help farmers to lead a sustainable production.

FACE RECOGNITION BASED ATTENDANCE SYSTEM

The aim of this project is to recognize faces using live camera and to mark attendance for the students. The project is built using python in a visual studio environment. It helps to eliminate the problems that were faced in manual attendance system.

Strength

I am a fast learner
I am flexible with all work environment
I'm punctual and sincere towards my work
